Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4,5,11,14,18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Karg. This patent discloses a chipper shredder including a roller used to shred the material.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3,7-10,12,13,16,17,21,22,24,25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Karg. The limitations of these claims would have been obvious design choices or are well known in the art. For example, the torque used would depend on several factors such as material being treated and desired end results. Also, biasing members to prevent jams is well known in the art and of no patentable merit.

Finally, the use of different teeth is known to provide for different shredding functions on a single roller.

Claims 6,15,23,26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Karg as applied to claim 1 above, and further in view of Morey. Karg does not have a reversible motor as a safety feature. Morey solves this problem by showing similar apparatus including the use of a reversible motor. In order to provide a safety feature, it would have been obvious for one of ordinary skill in the art to modify Karg by providing a reversible motor, taught to be desirable by Morey.

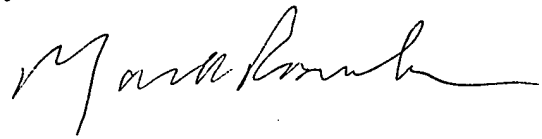

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
